Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) The invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Becker (6,736,460). Becker discloses the use of a vehicle seat comprising a seat carrier (22), a seatback (20) and a seat back hinge (located on the side of the seat shown on figure 1) is disposed between seat carrier and seat back which seat back is comprised of a lower hinge (24) arm and a upper hinge arm (26) associated with the seatback; a forward tilt axis (28) is provided to connect the upper arm to the seat back. The locking mechanism (30) is provided to prevent the forward tilting motion of the seat back about a forward tilt axis in the locked position; the locking mechanism includes a handle (60), further comprising a blocking lever is hinged to the seat back; the upper hinge arm has a complementary side. The retaining lever (34,36) is hinged to the seat back and forming a lug abutting against the retaining stop (56). In regards to claim 2, the upper hinge arm has an outer curve and wherein the retaining lever rests on the outer surface. In regards to claim 5, the retaining lever is elongated and the lever axis is located at one end region; the lug is located at the other end region.

Allowable Subject Matter

Claims 3-4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to vehicle seat with hinge: U.S Pat. No. US006513875B1, US005938286A, 4726622, US005460429A, 3736026, 5412964, 6464299, 6805410.
